

## APPLICATIONS Home Care

### Sodium bicarbonate has long been used as an ingredient in cleaning agents.

When mixed into a cleaning solution, sodium bicarbonate creates an alkaline environment that can be used to clean grease and dirt. Sodium bicarbonate's unique properties help break down normally difficult greasy messes allowing them to simply rinse away. With the added benefit of odor control, sodium bicarbonate can be used in many cleaning situations to remove dirt, grime, and unwanted odors.

Household odors are a common issue that can be combatted with sodium bicarbonate, a natural odor absorbing compound. When baking soda is placed in an area with odors, it reacts with the source of the offensive smell and produces an odorless salt. This reaction neutralizes the odor as opposed to simply masking it.

#### USES

Multi-Surface Cleaners, Refrigerator Deodorizer, Dish Soap, Kitchen Degreaser, Carpet Cleaners, Odor Control Powders

#### AVAILABLE GRADES

Grade	Product Uses
USP, USP #1, USP #2, USP #5, FCC	Multi-Surface Cleaners, Refrigerator Deodorizer, Dish Soap, Kitchen Degreaser
Industrial, Industrial #3, Industrial #5	Carpet Cleaners, Odor Control Powders
